Geetanshu Sharma

AI Engineer | Data Scientist
Dublin, Ireland | +353 89 441 0250 | geetsharma038@gmail.com
linkedin.com/in/geetanshu-sharma-2189a8103 | github.com/geet038 | Eligible to work in Ireland

PROFILE

Data Scientist and AI Engineer with hands-on experience across the full machine learning lifecycle, from data preprocessing and feature engineering to model development, insight generation, and reporting, alongside recent work building Python tooling on top of large language model APIs. Skilled in Python, SQL, Power BI, and Tableau, with a track record of shipping production ML solutions and turning data into actionable business insights. MSc in Information Systems from University College Dublin.

EXPERIENCE

AI Engineer, RakFort Ltd. (Remote, Internship) **Sep 2026 to Present**

- Build and test Python tooling that runs AI-driven security assessments covering static code analysis (SAST), dependency risk, threat modelling and secret scanning, with the findings presented in a web dashboard.
- Added support for running assessments through model APIs (OpenAI, Anthropic, Gemini) rather than requiring a locally installed tool, making automated scans possible in CI.
- Implemented usage and cost tracking so every assessment records its token usage and spend, visible per project and per activity.
- Improved reliability: automatic retries on provider rate limits, output validation, and cross-platform text handling fixes.
- Work delivered through pull requests with unit tests and CI, plus written documentation for technical and non-technical readers.

Data Scientist, Yumi Enterprises (Remote) **Feb 2023 to Dec 2025**

- Built and deployed end-to-end ML pipelines for customer sentiment analysis across 500K+ customer reviews, reaching 85% classification accuracy in production.
- Led data preprocessing, feature engineering, and model validation on large-scale datasets of 2M+ records using Python (pandas, NumPy, scikit-learn).
- Ran EDA and statistical analysis that surfaced business insights and informed product strategy.
- Tuned and evaluated models with cross-validation and performance metrics, improving reliability and generalisation.
- Translated business requirements into data-driven solutions, working closely with product and stakeholder teams.

Data Science Intern, Yumi Enterprises, Delhi, India **Oct 2022 to Jan 2023**

- Built initial data pipelines for collection, cleaning, and preprocessing that fed the sentiment analysis project.
- Supported feature engineering and model evaluation under senior guidance, and maintained documentation for reproducibility.
- Created Power BI and Tableau dashboards to visualise customer behaviour trends for stakeholder review.

Management Trainee, Data & Automation, Hitachi Systems India Pvt. Ltd., Delhi, India **Apr 2022 to Sep 2022**

- Cut daily report generation time by 20% by integrating automation tools with an internal chatbot.
- Built real-time Power BI and Tableau dashboards tracking key business metrics for faster management decisions.
- Developed REST API backend and Python and Django components to power automated reporting workflows.

EDUCATION

MSc in Information Systems, University College Dublin, Dublin, Ireland **2023 to 2024**

BTech in Electronics & Communications Engineering, AKTU, Uttar Pradesh, India **2018 to 2022**

SKILLS

Machine Learning: Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation, NLP, Deep Learning, Predictive Modelling
AI & LLM: Model APIs (OpenAI, Anthropic, Gemini), Prompt Design, AI/LLM Security Assessment, Token Usage & Cost Tracking
Data & Analytics: EDA, Data Cleaning, Statistical Analysis, ETL and Data Pipelines
Programming: Python (pandas, NumPy, scikit-learn), SQL, R, MATLAB
Visualisation & Reporting: Power BI, Tableau, Excel
Tools & Platforms: Git, Jupyter Notebook, MLflow, pytest, CI/CD, AWS (basic)
Professional: Analytical Thinking, Problem Solving, Attention to Detail, Cross-functional Communication

PROJECTS

Secfoo, AI Security Assessment Platform (RakFort Ltd.) | Python, LLM APIs, CI
Contributed to a platform that runs AI-driven security assessments covering static code analysis, dependency risk, threat modelling and secret scanning, with the findings presented in a web dashboard. Added model API support so assessments run in CI without a locally installed tool, plus usage and cost tracking per project and activity.

mlvisualized.com | Python, JavaScript, Open Source
Built and launched a free interactive ML education platform covering 30+ algorithms across six chapters, with live visualisations and step-by-step explanations that make machine learning accessible to learners at all levels.

AI Text Detector | Python, NLP, Machine Learning
Built a tool that identifies whether text was written by a human or generated by AI, using writing style, word patterns, and sentence structure as signals.
